Linch-pin supported PTTEP AA with the design (structural, piping, E&I), procurement, fabrication and installation preparations for the tieback of the H5 dry tree to the production manifold on the Montara WHP. This included the preparations of offshore procedures and workpacks.

The overall scope of work during this campaign was:

- Abandonment of GI-ST
- Drilling of H5 in the same slot
- Running of completion and setting of xmas tree
- Installation of conductor guide at WHP main deck
- Installation of production Hook Up (HU) spool
- Installation of gas lift HU spool
- Installation of Instrumentation and Controls
- Leak test of HU spools
- Commissioning of production well
- Well test and well clean up

The campaign was executed on schedule and below budget.
